

*Get going with projects  
from  $^{22}\text{Na}$  to the LHC*

# TOFHIR2 FOR **DUMMIES<sup>®</sup>**

*Demystifies  
everything from  
the T2TB to  
the FEB/D*

*A Reference  
for the  
Rest of Us!*

# **Chapter 1**

# **Hardware Setup**

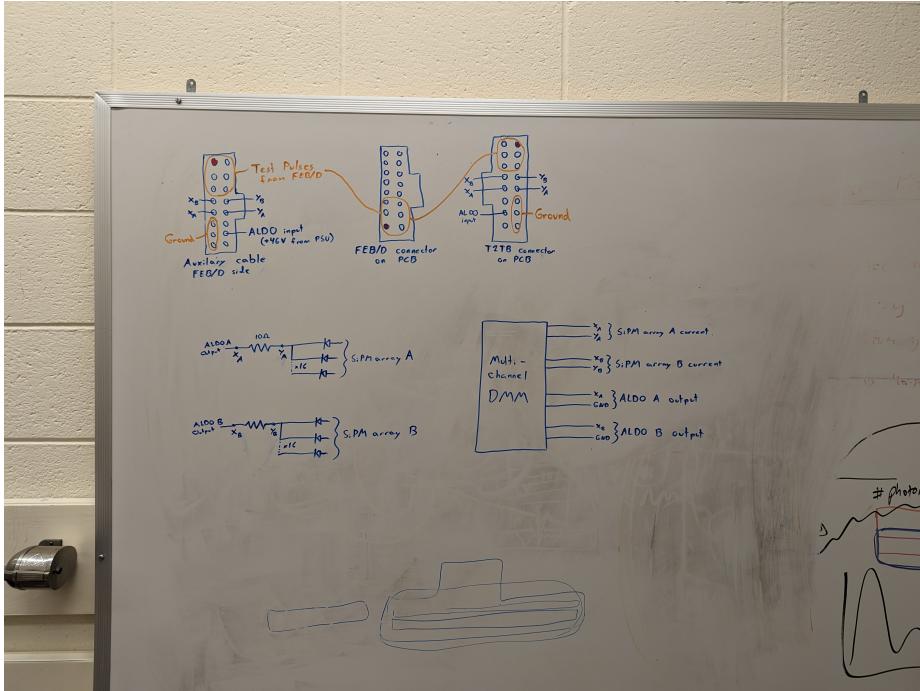

Figure 1.1: Whiteboard drawing showing how the ribbon cable from the FEB/D to the T2TB should be hooked up to a multimeter.

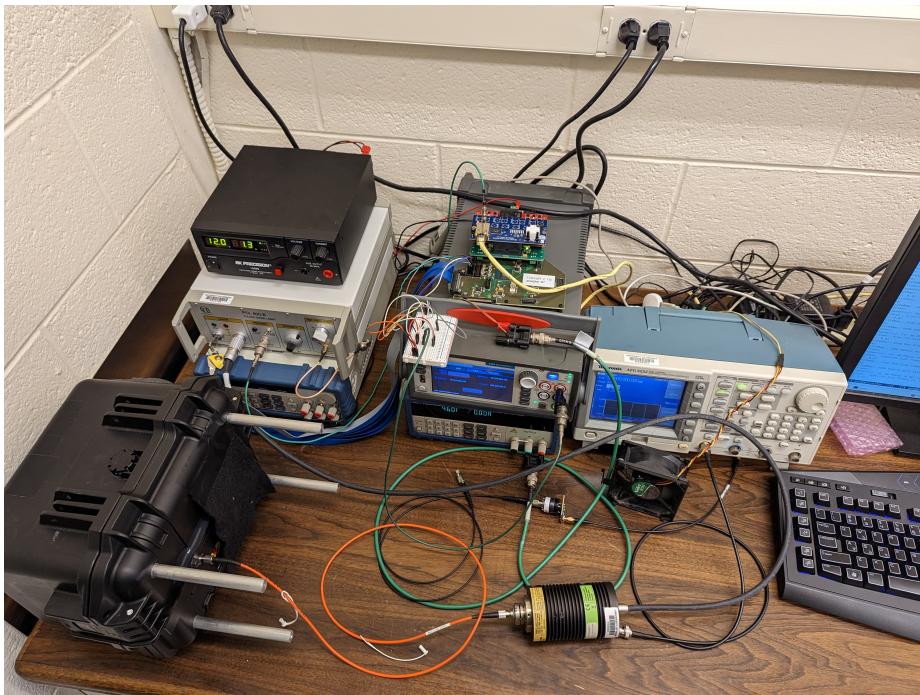

Figure 1.2: Picture of the FEB/D hooked up to the T2TB with connections set up to a separate bias supply and to a multimeter to allow the user to do bias calibrations.
